

Custom Business Applications

Outsource specializes in development of custom business applications. We can design and develop comprehensive and innovative IT solutions that meet our clients' business objectives. With our strengths in having developed and maintained applications for over 10 years we bring in experience in developing the right solutions at affordable costs. Our expertise is in using Microsoft Technologies and the latest Web 2.0 design technologies. We have developed IT solutions for managed healthcare, pharmaceuticals, travel industry, insurance, logistics, inventory management and supply chain management. Our applications are designed to maintain utmost security and confidentiality of client data with secure permission levels, encryption and compliance.

We specialize in developing data driven websites and client server applications based on Microsoft Technologies. We develop websites in ASP.NET, ASP.Net MVC framework and client server applications. Our database expertise is in programming for SQL Server and MS-Access using the latest frameworks for the frontend.

Cloud Based Product Development

In today's global economy, increased productivity and automation are vital for business success. Many companies are now moving towards cloud based applications to cut time and costs of implementation. Expert Outsource specializes in developing cloud applications using the latest technologies that save and costs for our clients. We have suite of products that are being used by customers worldwide for HR and Online Leave Management, Project Management, Time sheets and Expense management. We can develop cloud based products with quick turnaround time. We have expertise in setting up and launching application on cloud servers like AWS using web technologies like ASP.Net, MVC framework, Redis,KendoUI, MongoDB, Knockout.js and Pusher.

Custom Website Development

Outsource also specializes in developing custom websites for clients who want to project their businesses for a worldwide audience. We design search engine optimized websites that have an appealing design to reach out the main message to the target customers.

Gain a Competitive Edge

In today's global economy, increased productivity and automation are becoming vital for business success.

Cut Your IT budget by 30% to 50%

Depending on your ratio of in-houses staff to outsourced staff, the savings be amazing.

Dramatically Improve Productivity

Programmers + Synergy + Team work = Productivity.
Get the reports and applications you want quicker.

Self Managed Solution

We place Project Managers in change of programmers at a ratio of no more than 1:5 (one of the lowest in the industry). These Project Managers are trained to receive instructions from you and make sure the work gets done in a timely manner. What that means to you is a simple, no headache solution.

Quickly Assemble the Team you Need

If you need to assemble an effective team quickly for a specific project, this is perfect low cost, convenient way to do it.

Round the clock
phone support

Online Project
tracking software

In-house team leader
manages outsourced staff

Frontechas Outsource has the solution!

What is your support like ?

We have 24 hour phone support, and our policy is that if there are any problem on existing work, we will fix it on spot or by next business day.

You find our project managers easy to talk to, and very experienced. They can be contacted any time over phone, chat or email to solve technical issues. Everyone here is on the same team and is eager to serve you and get the job done. We pride ourselves on speedy, effective work.

How can i keep track of what's going on ?

Using Communilink our easy to use online Project tracking software. Communilink simplifies the many functions related to task management. It is designed specifically to assign and manage day to day tasks and link the onsite and offshore team seamlessly.

Key features :

- ▶ Task assignment with planned end dates and priority
- ▶ Printable daily, weekly, monthly status reports of work done
- ▶ End user requests
- ▶ Help desk
- ▶ Attach screen shots or files to task requests
- ▶ Discussion forum to clarify issues
- ▶ Email alerts on task completion
- ▶ Project Documentation

How well do you work with my already existing staff ?

The scenario of an in-house Team Leader who assigns works to outsourced staff works very well. If you are in a situation where you have work that needs to be done, your current staff is overloaded and the work requires high level programmers, then Expert Outsource is the first call you should make.

Is adding and dropping staff difficult ?

Absolutely not. You can use our staff for a short while to get a particular project done. Or you could augment your existing staff with our programmers on a long term contract. Adding new staff or subtracting existing staff is easy. Just call our customer service number **040 - 3582-2795**, tell us what you need, and we will take care of it immediately.
